# **PUTT PUTT AWAY POLLUTION**

Great green lawns of greasy, grimy  
phosphorus.

To the gutters from the street  
Now disgusting waters were once  
so sweet.

### **Fertile but Phosphorus Free.**

Americans spend 6 billion dollars each year on lawn care, not factoring the environmental impact lawns can inflict. Our lake is green because we over fertilize our grass and insist upon having rocky, rip rapped shoreline. Reduce your lawn size, mulch grass, use non-phosphorus fertilizers, and establish native buffers along water fronts.
