How to Determine the 100 Year Floodplain Elevation

The Map Search Results window will open (see below)
- Click on the globe/magnifying glass

A separate window will open with a map titled Itranetix Viewer. In order to orient where the parcel is within this map, use bing map or google map to locate the property (parcel lot lines are not included in the map)

Note: FEMA floodplain maps are to be used for insurance purposes and MCWD rules applicability.
- Refer to the FEMA website
- Enter in the full property number, street address (no abbreviations), state and zip code

The dark shade gray area is the 100 year floodplain (1% Annual Chance of Flood)
- Along this shaded area, you should be able to locate a contour of the 100 year floodplain elevation

Refer to the FEMA website
Enter in the full property number, street address (no abbreviations), state and zip code
