

MINNEHAHA CREEK WATERSHED DISTRICT

Wetland Check List

If you have one or more of the following, you may have a wetland on your property.

If you have a wetland on your property and you need to survey boundaries, you may want to contact a certified wetland delineator.

	Yes	No
The ground is often soggy underfoot		
There are depressions where water pools during wet periods		
There are areas I avoid with heavy equipment because I know I will get stuck		
I have thought about ditching these areas to dry them out		
The depressions have different vegetation than the kind growing on higher ground		
When I dig a hole, the soil is gray or has red or orange splotches against a gray background		
There are signs of crop stress related to excess moisture in areas where I farm		
The NRCS County soil survey shows soil on my property as being hydric, poorly or very poorly drained		
The National Wetland Inventory map (click here) shows wetland present		
The US Geological Survey topographical map shows wetland present		
The Minnehaha Creek FAW inventory map shows wetland present
