

## Bushman Rainwater Harvesting Tank System Packages

*Simple to order. Great warranty!*

**B**ushman offers a variety of above ground rainwater harvesting tank system packages, ranging from the basic tank only, to a complete rainwater harvesting system that includes the connection kit, filtering accessories and an external pressure pump. Dependent upon your installation location and specific needs, above ground rainwater harvesting tank system packages are available in several slimline, round and low profile configurations.

Bushman offers aesthetically pleasing styles and colors provided as complete system packages that are designed with the customer in mind. Tanks can be installed against a wall or on the ground, at virtually any desired location.

*Package 3, Signature System (BSLT 620 Tank Shown)*

### Features & Benefits

- High quality, one-piece rotational molded polyethylene ribbed construction assures maximum strength and long term durability
- Optional tank and pump installation kits are available separately, including all materials required for a complete system installation
- Available in 5 popular colors
- Bushman 5 year warranty

*NOTES: Actual component designs may vary from those shown in the illustration. On-site assembly required.*

# Package 1 - BASIC System

## **B**asic System - Package 1

The Basic System package includes:

- Tank with Inlet Strainer and Cover
